

MS DRG Group Summary

Overview: The MS DRG Group Summary dashboard captures the facility's DRG assignment percentages within each DRG group. The facility's statistics are compared to the hospital's peer group. The DRG groups are pre-determined and include both medical and surgical DRG groupings.

By default, the dashboard displays the data for reconciled inpatient encounters discharged in the last twelve calendar months.

Navigation: On the Analytics home page left side panel, navigate to **CDE One > Peer Group Comparison > MS DRG Group Summary**.

On the top panel, you can select desired values for the slicers (refer [Table 3: Report Slicers](#) on page 3) and the corresponding data gets filtered in the charts.

For filters on all pages, refer [Table 4: Filters on all Pages](#) on page 4.

For Footnotes, refer [Table 5: Footnotes](#) on page 4.

KPI Card	Description
Peer Group	Peer Group associated with selected facility.

MS DRG Group Summary

This chart displays encounter volumes, Case Mix Index (CMI), and percentages by DRG group across discharge months. It helps compare facility performance against the peer group at the DRG group level.

Info Icon (Text on hover): Encounter Status: Reconciled-Impact, Reconciled-No Impact, Auto-Reconciled.

MS DRG Group Summary Chart

MS DRG Group Summary														
Discharge Month	Jan 2023					May 2023					Jun 2023			
DRG Group	CMI	Encounters	% of Total	PG CMI	PG % of Total	CMI	Encounters	% of Total	PG CMI	PG % of Total	CMI	Encounters	% of Total	PG CMI
FGGroup1(64,65,66,69)

FGGroup7(321,322,323,324,325)														
FGGroup8(242,243,244)														
FGGroup9(231,232)														

Table 2: MS DRG Group Summary details

Column	Description
CMI	Average CMI of discharged encounters by DRG Group.
Encounters	Number of discharged encounters by DRG Group.
% of Total	Number of discharged encounters for DRG Group/ Total # of discharged encounters for DRG Group (100%).
PG CMI	Average CMI of discharged encounters for Peer Group by DRG Group.
PG % of Total	Number of discharged Peer Group encounters for DRG Group/Total # of discharged Peer Group encounters for DRG Group (100%).

Total Column Group Overview

The Total column group provides an aggregated view of CMI, encounters, and peer group comparison across the selected discharge date range. It enables users to evaluate overall performance rather than month-by-month trends.

The following columns display values for the selected date range:

Column	Description
CMI	The overall Case Mix Index for the DRG group.
Encounters	The total number of discharged encounters for the DRG group.
% of Total	The proportion of encounters for a specific DRG group out of all encounters across all DRG groups.

Column	Description
PG CMI	The percentage of encounters for a DRG group out of the total number of encounters.
PG % of Total	The distribution of peer group encounters across DRG groups.

Table 3: Report Slicers

Slicer	Description
Discharge Date	- Displays the discharge date range. Data is grouped by month based on the selected Discharge Date. Example: 1/1/2025 - 4/30/2025.
Reset Button	- With the Reset button, you can reset the discharge date range. Tooltip: Use Cltr + click to "Reset" to clear the discharge date and select the required date
Facility	This filter lists the facilities (in alphabetical order) that you have access to. You can also search for a facility using the Search field. You must select a facility to generate the report.
Payer Category	Displays the list of payer categories. - Displays both active and inactive categories. - You can select multiple categories. - You can search the categories by entering the payer category Search field. Default: ALL
DRG Group	Displays the list of DRG groups. - Displays both active and inactive groups. - You can select multiple groups. - You can search the groups by entering the group in the Search field. Default: ALL
Focus Group	Select the value you need, then choose the DRG group(s) to include or exclude from the chart. ALL: Includes all DRG groups in the chart. Y: Includes only the selected DRG group(s). N: Excludes the selected DRG group(s).

Slicer	Description
DRG Speciality	- Displays the available DRG Specialties. - Example: Transplant, Surgery, Neurosurgery. - You can select multiple specialties. - You can search the DRG Speciality. Default: ALL.  Note: The values selected in the DRG Specialty filter remain visible when you navigate to other dashboards.

Table 4: Filters on all Pages

Filter	Description
Patient Type	- Displays the available patient types. Example: Inpatient, Outpatient. Default: Inpatient.
Admit Service	- Displays the list of available admit service. - You can select multiple Units. - You can search the Admit Service. Default: ALL
Visit Type	- Displays the available patient types.Example: ED, IP, etc. - You can select multiple Visit Type. - You can search the Visit Type. Default: ALL
Encounter Status	The Encounter Status assigned to the encounter. Example: Reconciled Impact, Auto-Reconciled.
Discharge Month	Displays the discharge month as per the discharge date.
Grouper Type	Displays the DRG grouper type. Example: CMS.
Peer Group	Displays the peer groups. Example: PG1, PG3.

Table 5: Footnotes

Formula	Text on hover
DRG Group	Group of related Final (or Coding) MS DRGs.
CMI	The avg. of Final DRG WTs of all reconciled (Reconciled-Impact, Reconciled-No Impact, Auto Reconciled) encounters. If the CMI value is lower than the PG CMI, the CMI values are displayed in red.

Formula	Text on hover
Encounters	The count of all reconciled (Reconciled-Impact, Reconciled-No Impact, Auto Reconciled) encounters.
PG CMI	The avg. of Final DRG WTs of all Peer Group reconciled (Reconciled-Impact, Reconciled-No Impact, Auto Reconciled) encounters.
PG % of Total	The percentage of reconciled Peer Group encounters for a DRG or Group; % of Total = The count of reconciled Peer Group encounters for DRGs within a DRG Group/ The total count of reconciled Peer Group encounters for the DRG Group x 100.
